

Proposed language for inclusion in the Devil Canyon Project Draft License Application to advise FERC regarding agreement on some PM&E measures. The text was discussed at the October 30, 2018 meeting in Loma Linda. The table will be added to as agreement is reached on other PM&E measures.

Collaborative Development of Some PM&E Measures

From April through December 2018, DWR held eight meetings in Loma Linda, California and organized and held four conference calls with Relicensing Participants. The purpose of these meetings and conference calls was to collaboratively develop and agree upon certain PM&E measures that DWR would include in its DLA and that the Relicensing Participants would support. These meetings and calls were open to all Relicensing Participants. The following Relicensing Participants participated in one or more of the meetings or calls: SBNF, FWS, NPS, CDFW, DPR, PCTA, San Bernardino County Sheriff's Department, and San Bernardino County Fire Department (SBCFD). The SWRCB participated in the collaborative meetings and calls, but stated that it cannot agree to or take a position on the merits of any PM&E measures before completing its CEQA review of the proposed Project.

As a result of these collaborative discussions, DWR and the Relicensing Participants agreed that they will take the following actions provided there is no additional information discovered or changes in project conditions occur:

- DWR will include the agreed-upon PM&E measure unchanged in DWR's DLA and FLA and DWR will propose no other measures in the DLA or FLA related to the issue;
- SBNF will recommend to the Regional Forester to include the PM&E measure unchanged and will propose no other measures related to the issue in USFS's FPA Section 4(e) conditions and/or 10(a) recommendations;
- USFWS and CDFW will include the PM&E measure unchanged and will propose no other measures related to the issue in their respective Section 10(j) and/or Section 10(a) recommendations;
- NPS and DPR will include the PM&E measure unchanged and will propose no other measures related to the issue in their respective FPA Section 10(a) recommendations;
- Other agencies, PCTA and other stakeholders will propose the PM&E measure unchanged and no other measures related to the issue.

The collaborative group agreed to focus its efforts on the development of eight plans and one measure, which are listed in Table 1. Based on these good faith collaborative discussions, DWR and the Relicensing Participants listed in Table 1 reached agreement on [REDACTED] PM&E plans and measures with one or more Relicensing Participants. The PM&E plans and measures are included in Attachment [REDACTED] to this DLA.

Table 1. PM&E Plans and Measure on Which DWR and Stakeholders Reached Agreement, indicated by an “X” in the respective cell

PM&E Plan / Measure Included in Attachment to This DLA	DWR and Licensing Participants that Support the PM&E Measure							
	DWR	SBNF	FWS	NPS	CDFW	DPR	NGO	SBCFD
Fire Prevention and Response Plan	X	X						X
Hazardous Materials Management Plan	X	X						X
Visual Resources Management Plan ¹								
Erosion and Sediment Control Plan	X	X						
Transportation System Management Plan	X	X						
Silverwood Lake Fish Stocking Measure	X				X			
Integrated Vegetation Management Plan ¹								
Aquatic Invasive Species Control Plan ¹								
Recreation Plan ¹								
Total								

¹ DWR and the Relicensing Participants were not able to complete discussions on the Visual Resources Management Plan, Integrated Vegetation Management Plan, Aquatic Invasive Species Management Plan, or Recreation Management Plan. Collaborative discussions will continue with the goal of including final agreed to plans in DWR’s FLA.

Prior to issuance of the DLA, this section was provided to the Relicensing Participants listed in Table 1 for review and comment, and DWR understands that each Relicensing Participant listed in Table 1 agrees that this section accurately presents its position on the PM&E plans and measures listed in Table 1.

Following issuance of the DLA, DWR will continue to make a good faith effort to reach collaborative agreement on as many PM&E plans and measures as possible with as many Relicensing Participants as possible. DWR will update this table accordingly in its FLA.
