APPENDIX A

CEII SINGLE-LINE DIAGRAM OF THE DEVIL CANYON POWERPLANT

In accordance with Sections 5.30 and 4.32(k) of the Federal Energy Regulatory Commission (FERC) regulations, and in light of heightened national security concerns, the California Department of Water Resources requests that the single line electric diagram included in this Appendix of Exhibit F be treated by FERC as Critical Energy Infrastructure Information (CEII) under Section 388.112 of FERC's regulations, and not be released to the public.

The diagram satisfies the definition of CEII in Section 388.112(c) of FERC's regulations because it contains design information about existing critical infrastructure that relates details about the generation and transmission of electrical energy, and could be useful to a person planning an attack on critical infrastructure. Moreover, such information is exempt from disclosure under the freedom of Information Act 5 United States Code Section 552, and does not simply give the general location of the critical infrastructure.

Procedures for the public to obtain access to CEII may be found at 18 Code of Federal Regulations Section 388.113. Requests for access should be made to FERC's CEII coordinator.
