Area <small>(sq.ft.)</small>	Acre Class	NNIP Information <small>(overall site description, population quality/viability, immediate & surrounding land use), visible disturbance, threats, resource concerns, comments)</small>
					Vegetative	Flower	Fruiting				
BROTEC				25			100	1	4023 1.731	1	slope above v-ditch w/ open area. Surrounded by the GRIFAS, SALMEL, ARTCAL
BROMAD				35			100				
CENMEL				5	20	80					
SYDRA				2			100				
AVOBAR				2			100				
BRANIG				2	100	-					

Quantitative Data Collection: (A) If a plant population is estimated to cover > 0.1 acre or if >100 feet (linear) - map to the boundary. (B) If a plant population is <0.1 acre or if <100 feet (linear) then a map single central point and an estimate of acre class will be recorded. (C) Acre Classes: 1- up to 0.1 acre; 2- 0.1 to 0.25 acre ; 3- 0.26 to 4.0 acres; 4- > 4.0 acres

Qualitative Data Collection: (A) For widespread occurrences of NNIP, or for those which detailed mapping is unlikely to remain accurate (e.g., annual grasses, which change distributions yearly), describe general distribution and extent within the study area and estimate acre class. (B) If a population is identified on the perimeter of the FERC Project Boundary the extent of the population extending beyond the boundary will be estimated.

* D - discrete, or W - widespread ** C - concentrated, or D - diffuse
