## **1.0 INTRODUCTION**

The California Department of Water Resources (DWR) has prepared this Exhibit C, Construction History and Proposed Construction Schedule, as part of its Application for a New License Major Project – Existing Dam from the Federal Energy Regulatory Commission (FERC) for the Devil Canyon Project, FERC Project Number 14797. This exhibit has been prepared to conform with Title 18 of the Code of Federal Regulations (CFR), Subchapter B (Regulation under the Federal Power Act), Part 4, Subpart F (Application for License for Major Project – Existing Dam) (Traditional Licensing Process). In particular, this report complies with the regulations in 18 CFR Section (§) 4.51(d). For reference, 18 CFR § 4.51(d) states:

Exhibit C is a construction history and proposed construction schedule for the project. The construction history and schedules must contain:

- (1) If the application is for an initial license, a tabulated chronology of construction for the existing projects structures and facilities described under paragraph (b) of this section (Exhibit A), specifying for each structure or facility, to the extent possible, the actual or approximate dates (approximate dates must be identified as such) of:
  - (i) Commencement and completion of construction or installation;
  - (ii) Commencement of commercial operation, and
  - (iii) Any additions or modifications other than routine maintenance; and
- (2) If any new development is proposed, a proposed schedule describing the necessary work and specifying the intervals following issuance of a license when the work would be commenced and completed.

Excluding this introductory material, this exhibit incorporates two sections: Section 2.0 provides a proposed schedule for construction of new facilities and features; and Section 3.0 provides a list of references that were consulted to develop this exhibit. Refer to Exhibit A for a description of Project facilities and features, Exhibit B for a description of Project operations, Exhibit D for costs and financing information, and Exhibit E for a discussion of potential environmental effects and DWR's proposed resource management measures. Project design drawings are included in Exhibit F, and Project maps are included in Exhibit G. Exhibit H includes a detailed description of the need for the power generated by the Project, and other important miscellaneous information.
