Non-Native Invasive Data Collection Form

20170404-UC-NNIP3-4

046047 NWIP 4

Date	Surveyors (circle recorder)	Client	Project	Site	iPad/GPS/Camera ID
4/4/17	(SA) AN	DWR	Devil Cyn	DWR Hydro-power Plant	iPad
Site Notes	channel - earth bottom ~ 3' wide water present trees + NNG, RSS shrub understory + poison oak.				Also Jug cal + pla. rac.

Quantitative Data Collection: (A) If a plant population is estimated to cover > 0.1 acre or if > 100 feet (linear) - map to the boundary. (B) If a plant population is < 0.1 acre or if < 100 feet (linear) then a map single central point and an estimate of acre class will be recorded. (C) Acre Classes: 1- up to 0.1 acre; 2- 0.1 to 0.25 acre ; 3- 0.26 to 4.0 acres; 4- > 4.0 acres

Qualitative Data Collection: (A) For widespread occurrences of NNIP, or for those which detailed mapping is unlikely to remain accurate (e.g., annual grasses, which change distributions yearly), describe general distribution and extent within the study area and estimate acre class. (B) If a population is identified on the perimeter of the FERC Project Boundary the extent of the population extending beyond the boundary will be estimated.

* D -discrete, or W- widespread

** C- concentrated, or D- diffuse
