

Recorded, Scanned

Non-Native Invasive Data Collection Form

041017 NNIP 1

Date	Surveyors (circle recorder)	Client	Project	Site	iPad/GPS/Camera ID
041017	(Shelly Austin, Aaron Newton)	DWR	Devil Canyon	Mojave Siphon	iPad
Site Notes Along rocky base of slope upstream from concrete spillway leading up to where line of round buoys is in H2O					

Species Code	DIW *	CID **	Feature Type	Percent Cover (Absolute)	Percent Phenology			Total Photos	Approx. Area (sq.ft.)	Acre Class	NNIP Information (overall site description, population quality/viability, immediate & surrounding land use), visible disturbance, threats, resource concerns, comments)
					Vegetative	Flower	Fruiting				
TAM sp	D	C	Poly	40	100	0	0	1950 sf	1	40 total plants	
AVE sp.	D	D	↓	5	0	20	80	244 sf	1	Tot area = 4,877 sf.	
Beo MAD Rub	D	D	↓	1	0	85	15	49 sf	1		
V. rocky substrate Natives (on slope): Eri. lvs, Bac. sal, Elymus, Eri. m, Ach. glen											

Quantitative Data Collection: (A) If a plant population is estimated to cover > 0.1 acre or if > 100 feet (linear) - map to the boundary. (B) If a plant population is < 0.1 acre or if < 100 feet (linear) then a map single central point and an estimate of acre class will be recorded. (C) Acre Classes: 1- up to 0.1 acre; 2- 0.1 to 0.25 acre; 3- 0.26 to 4.0 acres; 4- > 4.0 acres

Qualitative Data Collection: (A) For widespread occurrences of NNIP, or for those which detailed mapping is unlikely to remain accurate (e.g., annual grasses, which change distributions yearly), describe general distribution and extent within the study area and estimate acre class. (B) If a population is identified on the perimeter of the FERC Project Boundary the extent of the population extending beyond the boundary will be estimated.

* D - discrete, or W - widespread ** C - concentrated, or D - diffuse
