

Non-Native Invasive Data Collection Form

4117

Date	Surveyors (circle recorder)	Client	Project	Site	iPad/GPS/Camera ID
041117	Shelly Austin Aaron	DWR	Dent Canyon	Mojave Spruce	2 iPad
Site Notes					
Newton W-facing slope above water spillway - Area dominated by NNG <sup>s</sup> , Tamarix. Some areas w/ Fri. Ln - Fri. Ln growing w/ NNGs in open lgs.					

Species Code	DIW	CID	Feature Type	Percent Cover Absolute	Percent Phenology			Total Photos	Approx. Area (sq.ft)	Acre Class	NNIP Information (overall site description, population quality/viability, immediate & surrounding land use), visible disturbance, threats, resource concerns, comments
					Vegetative	Flower	Fruiting				
BRTEC	W	C	Poly	60	0	80	20		1.1 ac	3	1.9 ac total NNG poly
BRMD	W	D	↓	15	0	90	10		0.3 ac	3	
BRDIA	D	D	↓								
BRHOR	D	D	↓								
BRCL	W	C	↓								14
TAMRAM	D	C	Poly	65	66%	33%	0	965 photos		1	= 13 plants 865 sf + 100 sf
PESMY	D	C									
											Other spp: Castilleja sp (20) Lupinus bic. Ceanothus (wh. flowers)
											2 separate polygons drawn

**Quantitative Data Collection:** (A) If a plant population is estimated to cover > 0.1 acre or if > 100 feet (linear) - map to the boundary. (B) If a plant population is < 0.1 acre or if < 100 feet (linear) then a map, single central point and an estimate of acre class will be recorded. (C) Acre Classes: 1- up to 0.1 acre; 2- 0.1 to 0.25 acre; 3- 0.26 to 4.0 acres; 4- > 4.0 acres

**Qualitative Data Collection:** (A) For widespread occurrences of NNIP, or for those which detailed mapping is unlikely to remain accurate (e.g. annual grasses, which change distributions yearly), describe general distribution and extent within the study area and estimate acre class. (B) If a population is identified on the perimeter of the FERC Project Boundary the extent of the population extending beyond the boundary will be estimated.

\* D - discrete, or W - widespread \*\* C - concentrated, or D - diffuse
